### AMENDMENTS TO THE CLAIMS

Kindly amend the claims as follows:

1 - 10. (Cancelled)

11. (Currently Amended) A counterfeit detection method comprising:

reading a label ~~on-attached to a retail product~~ manufactured item, said label  
incorporating a manufacturer-controlled identification number;  
querying a third party authority to verify that said item is a genuine product of its  
indicated manufacturer; and  
providing-generating a certificate of authenticity to provide to a purchaser of said  
retail-product item if said querying yields an affirmative result if an identification  
code encoded in said label and identifying said retail product is registered by a  
third party authority to a store from which said retail product is to be bought.

12. (Previously Presented) The method according to claim 11 and wherein said reading comprises scanning said label with a bar code reader.

13. (Currently Amended) The method according to claim 11 wherein said an identification number is encoded in said label and wherein said identification-encoded number is one of the following code types: one-dimensional bar code, two-dimensional bar code, RFID tag and a magnetic tag.

14 - 21. (Cancelled)

22. (Currently Amended) A point of sale unit comprising:

a reader to read a label attached to a ~~retail product~~ manufactured item, said  
label incorporating a manufacturer-controlled identification number; and
